MOREDesigual

Under the title MORE Desigual, we present our Spring Summer 2027 collection. An expression of our unmistakable DNA through shapes, fabrics and details that evolve our signature codes and bring them into the present.

This season reinterprets our silhouettes and prints through a fresher, more contemporary lens, designed for a new generation of women who are confident, curious and connected to what's next.

Print takes center stage, becoming the key expression of the collection. Across different creative universes, bohemian influences blend with Asian-inspired elements to create distinctive looks full of personality and designed to stand out.

Denim makes a powerful comeback through bold, high-impact silhouettes, while a cohesive and daring color story ties the collection together, seamlessly connecting each universe.

For another season, we continue our collaboration with Monsieur Christian Lacroix, exploring new creative territories together. Among the highlights is the launch of our first swimwear collection within this partnership, bringing a more elevated and refined approach to beachwear.

More than a collection, MORE Desigual is an invitation to embrace individuality, celebrate self-expression and step into the season with confidence, creativity and a sense of discovery.

We present a renewed accessories collection created under a contemporary and cohesive vision, closely aligned with current trends and what today's consumer is looking for. The offer is refreshed with new silhouettes, refined details, and improved functionality, while reinforcing our best-selling styles. The result is a versatile, balanced, and commercially strong selection that feels fresh, relevant, and effortlessly cool.

BACK TO THE ORIGINS

We revisit the essence of the Mandala from a contemporary, fresh perspective, reinterpreting it through new materials and treatments such as denim, contrast detailing, and other elements that give it a more modern and distinctive character. This transgressive concept is translated into more current, commercial patterns, expanding both the range of silhouettes and the color palette.

PLAIN TERRITORIES

The LIPS bag is established as a fully distinctive concept of our own. We continue to develop the GALA universe, a consolidated line with strong commercial performance and a high-quality, well-defined brand identity. New patterns and an updated color palette are introduced, while reinforcing our best-selling iconic designs. We also present a new concept fully aligned with our DNA: fresh, distinctive, and unique.

HALF LOGO

We elevate the quality and identity of our basics line by introducing a multifunctional applique with strong visual impact, allowing straps to be extended, used independently, or worn as a jewelry-like piece. We maintain high-quality materials and replace raffia with denim for the summer season. The color palette is expanded and our range of patterns evolves. We keep best-selling silhouettes such as Lanuza and Sumy, while adding new, more current and commercial shapes to enrich the collection.
