Elements Keepers Set

Dimensions: 2.5" W x 1" H
Color hues may vary.

A set of 4 small, stoneware bowls for each element. Easy to travel with or fit in small spaces. The tag reads, "Arrange your bowls on an altar or sacred space and fill them with the elements. Connect with them, and remember you are a creation of them. Earth/Brown offers us grounding, clearing, and a sense of belonging. Air/Yellow offers us freshness, breath, and spaciousness. Fire/Red connects us to our purpose and spiritual path. Water/Blue offers clearing, cleansing, and peace.

Clay Concretions

Also known as "mud babies" and "clay dogs", but perhaps best known as the "Fairy Stone", the name given to them by the Algonquin Tribe in Northern Quebec. They bring well-being, prosperity, and are considered lucky charms. They naturally occur and form when carbohydrates, silica, sulfates or pyrite grow in the clay matrix. These are made by the Earth and have varying shapes and sizes.

Pages: 26

Simon the Gnome hears a voice he has never heard before. His Fairy, Undine, and Salamander friends help him discover who it is. Once Simon discovers 'Clay,' he starts to play and gets creative. His greatest discovery is that he is magical. Join Simon on his adventure and find out how YOU are magical!

This beautiful book is created with magical photograph illustrations of hand-felted characters.

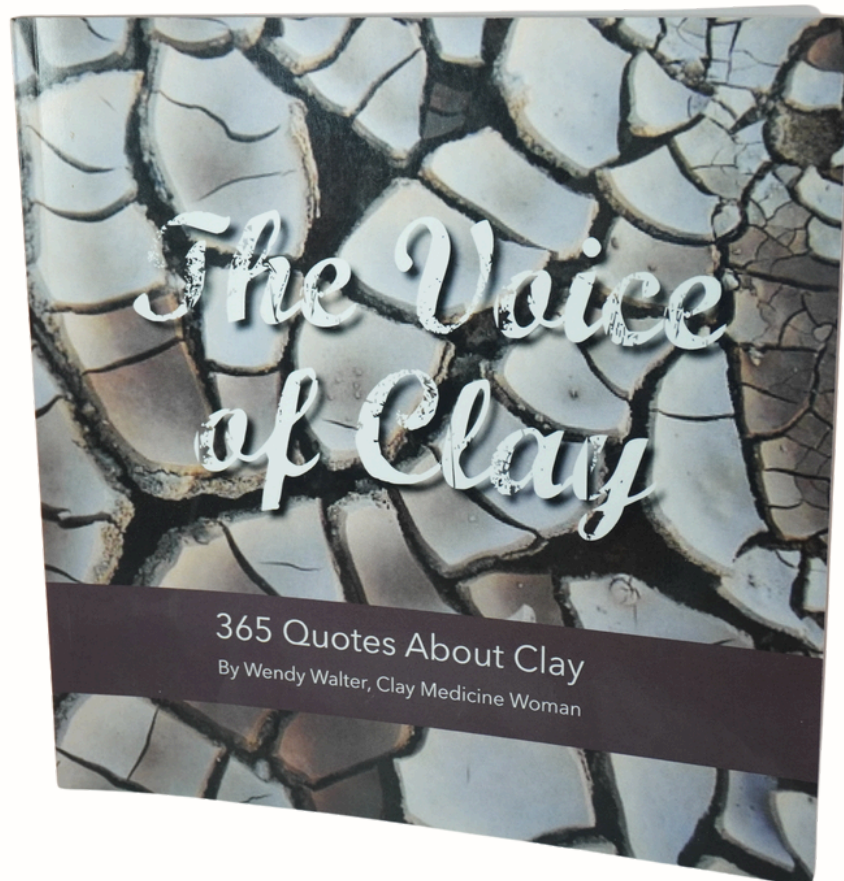

Book: 365 Quotes About Clay

Dimensions: 8.5" H x 8.5" W

Pages 196

Clay's influence in our lives is more than most realize. Used in medicine (mainstream and alternative), esthetics, by scientists, biologists, geologists, builders, and of course potters (among others), it weaves together a tapestry of disciplines that would not normally be perceived as connected. Described in these quotes as crystalline, electromagnetic, a living being, a mode of consciousness, source of light, healer, purifier, direct, sensual, dimensional, and more. This sacred material reveals to us how science, spirituality, religion, crafts, art of all kinds, philosophy and psychology are more effective in collaboration, and through the lens of similarities.
