About Us

albert L. (punkt) USA was founded in 2018 in Coupeville, Washington State, on beautiful Whidbey Island, to bring our bamboo products into the North American market. We settled in an old historic bowling alley where you can still find the original lanes, pins, shoes, and decor, as well as a functional warehouse for our US operations.

Albert L. Vietnam

Nguyen Thi Thanh Mai first approached us about her project in 2004: She planned to support artisans from northern Vietnam so that they could market and export their products themselves in order to achieve economic independence.

The goal of preserving and promoting traditional crafts are incredibly important to us. Mai established our operations in Hanoi, Vietnam to ensure that our handcrafted products follow European and American standards in terms of social benefits, safety and quality.

Without Mai's dedicated work on the ground in North Vietnam, we would not be able to produce these beautiful collections in such a sustainable, fair and excellent quality and offer them to our customers worldwide.

Our Artists

Left to Right: Mr. Quyet, Mr. Lan & Mr. Khanh

The manufacturers of our products are the heart of our company. Mr. Khanh, who is supported by Mr. Lan, produces the raw bamboo products and sources our high quality raw bamboo. Mr. Quyet is the artistic mind behind what brings our European designs to life and developed the process of lacquering our products to bring us our iconic gloss and matte finishes.

These artists, as well as the rest of our team in Vietnam, have perfected the craftsmanship and quality you find in all of the products we offer.

OUR BOWLS FROM
START TO FINISH

Making of

Prior to processing our bamboo, it is soaked in water for several months. After drying, the bamboo pieces are split and then cut into strips and pressed.

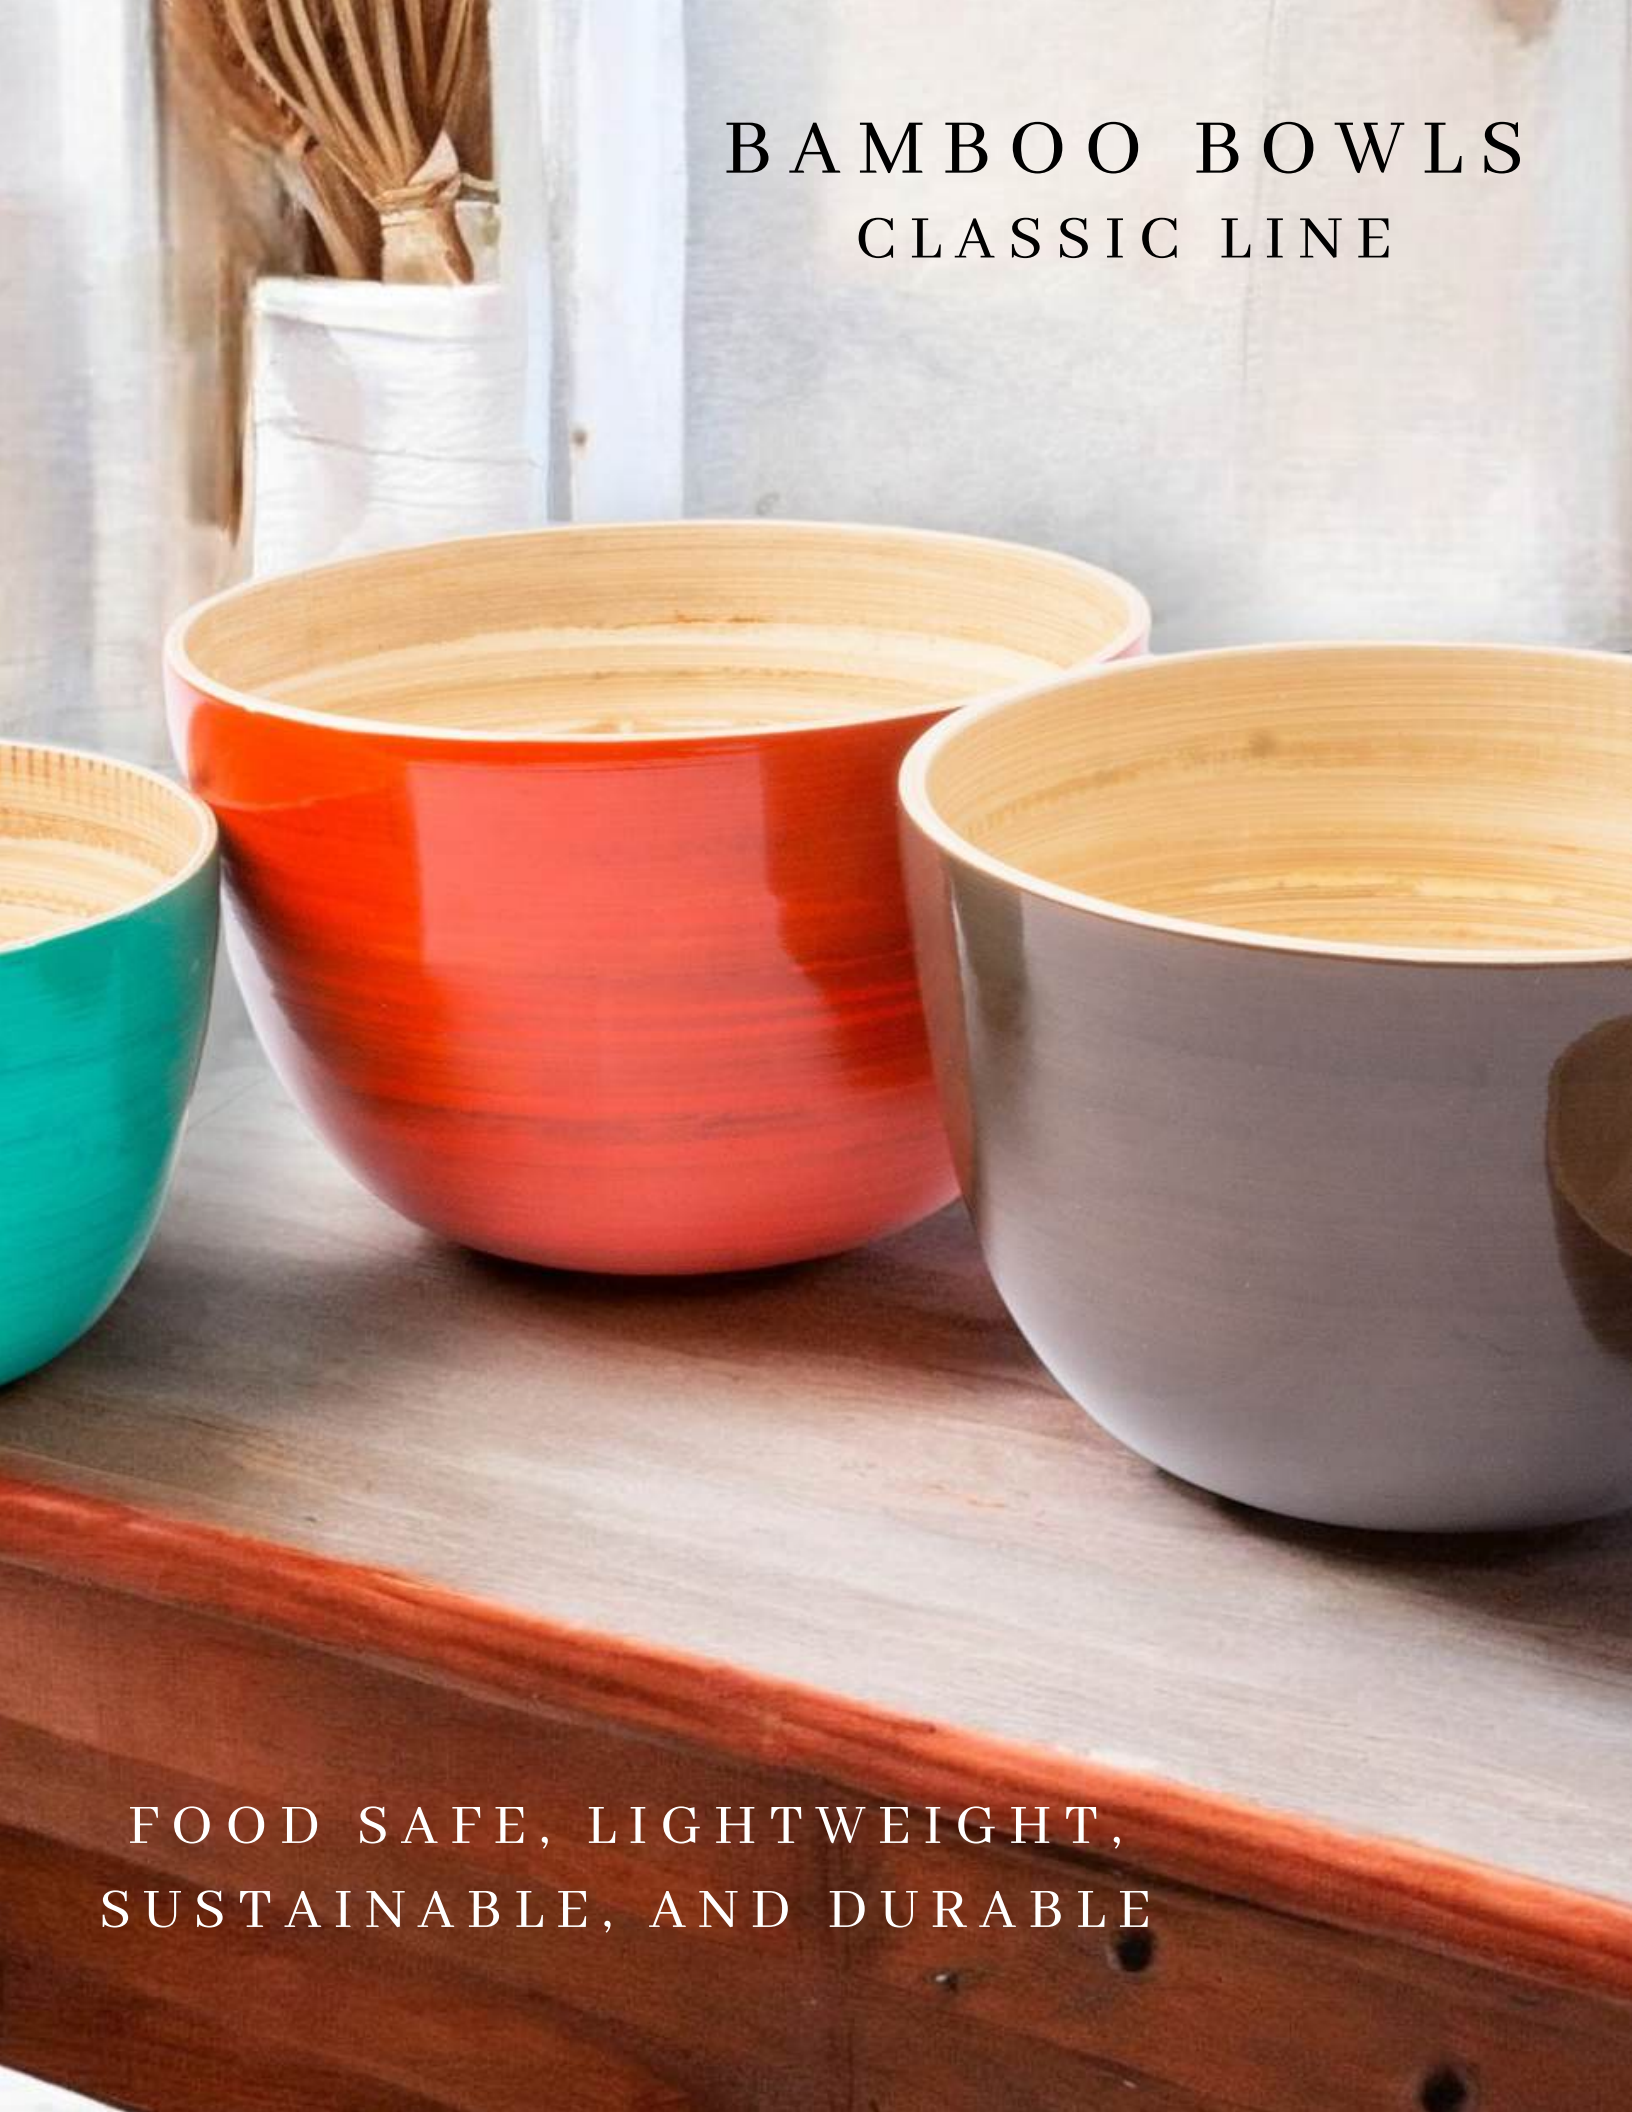

They are bent into rings, flattened into discs, and formed into a bowl shape using a stone mold.

The resulting raw product is filled with rice flour in several passes, primed with lacquer and carefully sanded.

Finally the top coat (matte or gloss) is applied, and the product goes through its final steps; over a dozen applications of lacquer and color.

A photograph of three bamboo bowls in teal, orange, and grey, arranged on a wooden surface. In the background, a white container holds a bundle of dried reeds. The text 'BAMBOO BOWLS' and 'CLASSIC LINE' is overlaid in the top right, and 'FOOD SAFE, LIGHTWEIGHT, SUSTAINABLE, AND DURABLE' is overlaid in the bottom left.

Fact Sheet

Our products are food-safe and are perfect for salads, fruits, bread, pasta, pastries, sweets, and much more. We test our products regularly with multiple international agencies for food-safety.

Our products are made to be used with food, thus harsh foods like tomato paste, vinegar, vinaigrette, soups, cold foods, and everything else is perfect to use in our bowls.

For care, simply clean with warm water and mild dish detergent. Do not put these products into a dishwasher or microwave. Avoid storing near a heating source, like an oven, furnace, or fireplace. We recommend to not store liquid in our bowls for longer than 1 - 2 hours at a time.
